Julia Odgers Website Design and Online Marketing

Kids Should be Kids

Price per Unit (piece): [Call for Pricing](#)

This client wanted to launch her newly developed website by attracting and retaining new prospects/converting them to customers. I produced a series of recommendations, including quick wins based around seasonal retail opportunities and then followed these through to implementation. This plan includes producing website and promotional copy and graphics, as well as sourcing and liaising with external contacts to run the campaigns and promotions. This is an ongoing project and will include developing a linking strategy, SEO and article writing.

Unsolicited feedback from client:

'you made a huge difference to my little business - I have no doubt about that and I learned a lot from you.'

Malene Stanley
